

# Print Solutions for the wood industry

2017

## Repaired or new wooden pallets printed with text & logo in line!

State-of-the-art digital print solutions that exchange existing technologies because of speed, high print quality and cost of ownership.

We offer a energy saving solution instead of branding. No more manual marking and easy to change text and logo without additional costs.

Repaired pallets are often painted and afterwards marked again with text and logo for property identification purposes.

Many companies mark the pallet by hand which is time consuming and expensive.

The print quality is very poor and not readable in many cases.

Go4inkjet offers you the solution!

Branding of various qualities of blocks with the technology of today!.

Printspeed > 42 mtr. / min.

**All types of blocks can be marked real black.**

Our printing systems can print onto all kinds of wood material even when the wood is still wet.

Planks printing for agriculture crates is flexible with a perfect print quality.

The print is very UV light stable and even after 10 years it will be still very black.

**Our inks are environmental friendly and non-flammable.**

Energy saving! Immediate change of text & logo!

Planks printing !
